

Another Toolbar

by Ekkehart Schlicht

January 2005

My toolbar looks like this:

with

Icon	LyX command	Purpose	Menu Command
	buffer-view_pdf2	invoke pdflatex	View PDF(pdflatex)
	reference-insert	insert cross reference	Insert Cross Reference
	citation-insert	insert citation from BiBTeX	Insert Citation Reference
	bookmark-save_1	insert bookmark 1	Navigate Bookmarks Save Bookmark 1
	bookmark-goto_1	go to bookmark 1	Navigate Bookmarks Goto Bookmark 1
	bookmark-save_2	insert bookmark 2	Navigate Bookmarks Save Bookmark 2
	bookmark-goto_2	insert bookmark 2	Navigate Bookmarks Goto Bookmark 2
	label-insert	insert label	Insert Label

	font-free	repeat last character formatting	Layout Character
	math-mode	toggle math mode	Insert Math Inline Formula
	math-panel	math panel	Insert Math Math Panel
	math-subscript	subscript	
	math-superscript	superscript	Insert Math Panel Superscript
	math-delim_(<u> </u>)	braces	Insert Math Panel Delimiters and Brackets
	frac	fraction	Insert Math Panel Fraction
	dot	dot (frame decoration)	Insert Math Panel Frame Decorations
	hat	hat (frame decoration)	Insert Math Panel Frame Decorations
	tilde	tilde (frame decoration)	Insert Math Panel Frame Decorations
	bar	bar (frame decoration)	Insert Math Panel Frame Decorations
	find-replace	find and replace	Edit Find & Replace
	ert-insert	insert LaTeX code	Insert TeX

To install this toolbar,

1. Make a backup copy of your "image folder" "...\\lyx\\share\\lyx\\images"
2. Copy the included folder "images" into the directory "...\\lyx\\share\\lyx".
Confirm overwrite for several images.
3. Copy the included folder "ui" into the directory "...\\lyx\\share\\lyx".
Confirm directory overwrite.
4. Open LyX, select Edit → Preferences → Look and Feel → User Interface → User Interface File → Browse, select "...\\lyx\\share\\lyx\\ui\\es.ui".

If you want to make other icons, open an icon file you want to modify with Word Pad.
The xpm files are pure text files, the format is largely self-explanatory.

For changing the toolbar, edit the text file "...\\lyx\\share\\lyx\\ui\\es.ui" with a word processor.
